

Perspectives on Conflict

Observation Tool Physiological/Biological Perspective

As you watch *Mirror, Mirror*, look for evidence that can be explained (at least in part) from a physiological / biological perspective. Specifically, look for evidence of:

Genetics/ chromosomes

Hormones/chemicals/physical injury

Physiological Arousal

Observable environmental stimuli (factors that may stimulate the organism such as temperature, increased physical activity, stress, and so on)

From this perspective, what questions would you want to ask or inquiry/experiments would you want to conduct in order to better analyze the conflict?
